

# FenuHoney Wound and Burn Dressing

FenuHONEY with active Buckwheat Honey are intended for the management of light to moderately exuding wounds by providing a moist environment, which is conducive to wound healing, and supports and aids autolytic debridement. These dressings are intended for the management of the following:

- Diabetic foot ulcers
- Leg ulcers (venous stasis ulcers, arterial ulcers and leg ulcers of mixed etiology)
- Pressure ulcers/sores (partial and full thickness)
- 1<sup>st</sup> and 2<sup>nd</sup> degree partial thickness burns
- Donor sites
- Traumatic an surgical wounds

4 Year Old Girl Scalding Burn – 6 days fully epithelialized

A 29 years old male with injuries related to thermal burn by hot oil
